Our elected leaders, As a person and family that uses the car for business, personal business, and vacations I am amazed that you would restrict information to the genral public about traffic and weather in the cities we visit. As someone who travels the state of Florida and who lives in South Florida XM with local stations is a godsend. It has saved me hours of time not sitting in traffic and has allowed me to schedule trips depending on the weather. These two issues alone have saved me a tremendous amount of time and money. I wish that it was available in more mid-sized as well as larger markets. There have been many times when local stations do not come in properly or do not offer traffic and weather in a timely fashion and XM does it for me in my travels. Please do not bow down to lobbyists and do what's right for the PEOPLE that elected you. I for one will be looking for the vote on this bill and those who try to block XM from carrying traffic and weather and if someone from my district votes to limit XM I promise I will vote against them. Also I will be sending this e-mail along to my coworkers who are 1500 strong and fellow road reps as well. I hope you are listening!

Thank you,

Alan Piter
